

INSTITUTE OF INTERNAL AUDITORS

BEYOND THE BASICS -ESSENTIAL SKILLS & PRACTICES

Date: Wednesday, 6 - Friday 8 September 2017

Venue: Hilton Hotel, Nairobi

OVERVIEW:

This course goes beyond the basic auditing tools & techniques and it is designed for internal auditors with 1-5 years of experience who need to move to the next level in internal audit, adding value and providing future-focused insight when performing audit engagements. The course will provide essential skills and practices that are embedded in the IIA's Global Internal Audit Competency Framework. The Curriculum is designed to engage you in group discussions based on real-world scenarios and case studies. These activities will help you identify opportunities to improve the efficiency and effectiveness of the internal audit process.

COURSE OBJECTIVES:

- Employ critical thinking skills to apply key principles in IPPF guidance to real world internal audit challenges.
- Compare major risk management and internal control frameworks.
- Apply risk and control frameworks using real-world internal audit activities.
- Evaluate the risks responses and key controls needed to complete a top down risk assessment.
- Apply business acumen and critical thinking skills in audit project planning.
- Identify the types of Evidence used to meet audit projects objectives.
- Apply persuasion, collaboration and critical thinking.
- Apply process improvement techniques and innovations to identify opportunities to improve your internal audit activity.
